EVIDENCE ON ACTION TAKEN REPORT

ALUMNI FEEDBACK 2022-2023

1. **Alumni suggestions:** Need extra training for placement.

Action taken: To address the identified gaps in training and preparation for placement as highlighted by alumni feedback. This initiative aims to enhance the effectiveness of career and academic support services by incorporating insights and recommendations from former students who have experienced these challenges first-hand.

Evidence: Placement programme photos are given as evidence.

TOPICS

1. Targeted Delivery: Nanocarriers can deliver drugs directly to specific cells or tissues, reducing side effects and improving efficacy.
2. Controlled Release: Nanoparticles can be designed to release drugs in a controlled manner over time, enhancing therapeutic effects.
3. Improved Solubility: Nanotechnology can increase the solubility of poorly water-soluble drugs, improving their absorption and bioavailability.
4. Protection of Drugs: Nanoparticles can protect drugs from degradation in the body, increasing their stability and shelf life.
5. Enhanced Permeability: Nanocarriers can facilitate drug transport across biological barriers, like the blood-brain barrier.
6. Multifunctionality: Some nanocarriers can carry multiple drugs or combine therapeutic and diagnostic functions (theranostics).
